

Oscar O. Jimenez Peguero

IT & Communications Engineering Student · Cybersecurity · Software Development

Santo Domingo, Dominican Republic · +1 809 966 2254 · oscar@osnarci.online · LinkedIn · GitHub · osnarci.online · securitysmartservices.site

Professional Summary

9th-semester IT Engineering student who has administered a live institutional CRM, deployed and administered production servers and VPS infrastructure (Cloudflare Workers, Fly.io, Render, Docker) for four independently shipped full-stack web applications, and run vulnerability assessments across production network infrastructure. Combines hands-on cybersecurity practice (Google Cybersecurity Professional Certificate, Microsoft Cybersecurity Architect, Cisco Ethical Hacker) with working proficiency in React, TypeScript, Python, and SQL. Operates effectively in multidisciplinary, high-pressure environments, evidenced by coordinating media operations for a FIFA-sanctioned international tournament.

Professional Experience

CRM Assistant / Cybersecurity Analyst / Jr. Software Developer — Universidad Iberoamericana (UNIBE) — Santo Domingo, DR | Jul 2025 – Present

- Administer the institutional CRM platform for the IT Department, mapping and redesigning workflows to reduce manual processing steps and improve operational efficiency.
- Conduct recurring vulnerability assessments, continuous network monitoring, and server administration tasks, strengthening the organization's overall cybersecurity posture.
- Maintain and extend the institutional website on WordPress/Breakdance, delivering front-end improvements while maintaining uptime and platform reliability.

Official Volunteer — Media Operations and Services — FIFA U-17 Women's World Cup 2024 — Santo Domingo, DR | Oct – Nov 2024

- Delivered logistical support and on-site event coordination for a FIFA-sanctioned international tournament, operating across multicultural teams under high-pressure, time-critical conditions.

Projects

Security Smart Services — Flagship project · In production · 2025

securitysmartservices.site

- Network security audit platform: inventories devices, detects exposed ports and services, and alerts on changes or threats.
- Cloud + local-agent architecture: scanning runs locally and never exposes the network to the internet, only outbound connections over WSS — a deliberate privacy/security decision.
- Deployed and administer the Node.js/Express backend server on a Fly.io VPS instance, alongside a Supabase-managed PostgreSQL database server.
- AI assistant that interprets each scan result.
- Stack: React 18, TypeScript, Supabase, Node.js/Express, Groq AI (Llama 3.3 70B), Clerk, Fly.io, nmap.

Nutriflow — In production · 2025

nutriflow-sigma.vercel.app

- Nutrition management app for body recomposition (gain, lose, or maintain weight; build muscle).

- Meal logging, daily macro calculation (protein, carbohydrates, fat) against goals, meal plans, and fasting control.
- Zero-cost infrastructure.
- Stack: Next.js, Supabase, Groq AI, TypeScript, Tailwind.

Active Calendar — In production · 2026

activecalendar.site

- Academic management tool that ingests the Blackboard (Anthology) calendar and displays the week's tasks with a pending/done status.
- Exports reports as PDF, TXT, or PNG; Telegram bot with schedulable weekly reports plus email delivery.
- Backend deployed as a Cloudflare Worker (serverless edge server), backed by a Supabase database server.
- Stack: Cloudflare Workers, Supabase, Telegram Bot API, TypeScript.

Productivity OS — In development · 2026

productivity-os-beryl.vercel.app

- Productivity dashboard with customizable widgets (size, color, views), cloud-synced via a Google account.
- Widgets: clock, weather, traffic, unread emails, bookmarks manager, crypto, currencies, sports scores, and an AI assistant. Designed for multi-monitor setups.
- Stack: React, Google OAuth, Spotify API, Groq AI, third-party integrations.

Personal Portfolio — osnarci.online

Personal website built from scratch in vanilla HTML, CSS, and JavaScript; publicly hosted and actively maintained.

Academic Projects

- TIC Tours — co-developed a university programming platform.
- Unit conversion tool integrating external APIs, built in Python.
- Performance comparison simulator (single-cycle vs. pipelined processors) with an interactive HTML interface, built in Python.
- Designed and integrated relational databases across multiple academic projects.

Technical Skills

Languages & Technologies: Python (intermediate), SQL, HTML, CSS, JavaScript (basic–intermediate), TypeScript (intermediate), React, Next.js, Java (basic)

Cybersecurity: Kali Linux, Ethical Hacking, Penetration Testing, Vulnerability Analysis, Wazuh (SIEM), Wireshark, Cisco NetAcad

Servers & Infrastructure: Linux server administration, VPS deployment & management (Fly.io, Render, Oracle Cloud, GCP), Cloudflare Workers (edge servers), Docker, self-hosted services (n8n), PostgreSQL, DNS/SSL configuration

Systems & Virtualization: Linux (Ubuntu, Kali), Windows, VMware, VirtualBox

Tools & Platforms: GitHub, WordPress, Breakdance, Figma (basic), Jira, Excel (advanced), CRM administration (Odoo, Salesforce), Supabase

Languages: Spanish (native), English (B1/B2)

Education

B.Eng. in Information and Communications Technology — Universidad Iberoamericana (UNIBE) — Santo Domingo, DR | 2023 – Present (9th semester, expected graduation 2027)

Certifications

Google Cybersecurity Professional Certificate (8 courses), Google/Coursera — Dec 2025 · Microsoft Cybersecurity Architect, Microsoft — Nov 2025 · Technical Introduction to Cybersecurity 3.0, Fortinet Training Institute — Oct 2025 · Ethical Hacker, Cisco Networking Academy — Feb 2024 · Introduction to Cybersecurity, Cisco Networking Academy — Feb 2024 · Ethical Hacking and Pentesting, Hacker Mentor — Sep 2024 · Computer Security from Scratch, Udemy — Jan 2024 · NDG Linux Unhatched, Cisco/NDG — Jun 2024 · Digital Transformation, University of Virginia/BCG/Coursera — Oct 2025 · Generative AI Applications, Google Cloud/Coursera — Oct 2025

Core Competencies

Teamwork and collaboration · Problem-solving · Effective communication · Adaptability · Continuous learning · Time management
