About Me

9th-semester IT Engineering student with hands-on experience administering an institutional CRM platform, deploying and administering production servers and VPS infrastructure (Cloudflare Workers, Fly.io, Render, Docker), performing vulnerability assessments and network monitoring, and building four full-stack web applications independently. Comfortable operating in multidisciplinary, cross-cultural teams and delivering functional outcomes under deadline pressure.

Work Experience

Jul 2025 – Present CRM Assistant / Cybersecurity Analyst / Jr. Software Developer

Universidad Iberoamericana (UNIBE) — Santo Domingo, Dominican Republic

- Administer the institutional CRM platform for the IT Department; map and redesign workflows to improve operational efficiency.
- Perform recurring vulnerability assessments, continuous network monitoring, and server administration as part of the institution's cybersecurity posture.
- Maintain and extend the institutional website (WordPress/Breakdance), delivering front-end improvements and ensuring platform reliability.

Business or sector: Higher Education / IT Department

Oct 2025 – Nov 2025 Official Volunteer — Media Operations and Services FIFA U-17 Women's World Cup 2024 — Santo Domingo, Dominican Republic

- Provided logistical support and on-site event coordination for a FIFA-sanctioned international tournament, working across multicultural teams under demanding operational conditions.

Business or sector: International Sports Event

Education and Training

2023 – Present (9th semester) B.Eng. in Information and Communications Technology

Universidad Iberoamericana (UNIBE) — Santo Domingo, Dominican Republic. Expected graduation: 2027, in line with current curriculum plan.

Personal Skills

Mother tongue: Spanish
Other language: English

	Understanding		Speaking		Writing
	Listening	Reading	Spoken interaction	Spoken production	
English	B1/B2	B1/B2	B1/B2	B1/B2	B1/B2

Communication skills: Effective communication developed through multicultural teamwork (FIFA U-17 Women's World Cup 2024) and cross-functional collaboration in an institutional IT department.

Organisational / managerial skills: Workflow mapping and process optimization (CRM administration); event logistics coordination under time pressure.

Job-related skills: Server and VPS administration (Fly.io, Render, Oracle Cloud, GCP); vulnerability assessment and network monitoring; ethical hacking and penetration testing fundamentals; CRM administration (Odoo, Salesforce); relational database design; full-stack web application development.

Digital skills

Information processing	Communication	Content creation	Safety	Problem solving
Advanced	Proficient	Proficient	Advanced	Proficient

Programming/technologies: Python (intermediate), SQL, HTML, CSS, JavaScript (basic–intermediate), TypeScript (intermediate), React, Next.js, Java (basic)

Cybersecurity tools: Kali Linux, Wazuh (SIEM), Wireshark, Cisco NetAcad, vulnerability scanning and penetration testing tools

Servers & infrastructure: Linux server administration, VPS deployment & management (Fly.io, Render, Oracle Cloud, GCP), Cloudflare Workers (edge servers), Docker, self-hosted services (n8n), PostgreSQL, DNS/SSL configuration

Systems: Linux (Ubuntu, Kali), Windows, VMware, VirtualBox

Platforms: GitHub, WordPress, Breakdance, Figma (basic), Jira, Excel (advanced), Supabase

Driving licence: Not specified

Additional Information

Certifications

- Google Cybersecurity Professional Certificate (8 courses), Google/Coursera — Dec 2025
- Microsoft Cybersecurity Architect, Microsoft (Gold Learning Partner) — Nov 2025
- Technical Introduction to Cybersecurity 3.0, Fortinet Training Institute — Oct 2025
- Ethical Hacker, Cisco Networking Academy — Feb 2024
- Introduction to Cybersecurity, Cisco Networking Academy — Feb 2024
- Ethical Hacking and Pentesting, Hacker Mentor — Sep 2024

- Computer Security from Scratch, Udemy — Jan 2024
- NDG Linux Unhatched, Cisco/NDG — Jun 2024
- Digital Transformation, University of Virginia/BCG/Coursera — Oct 2025
- Generative AI Applications: Transform Your Work, Google Cloud/Coursera — Oct 2025

Projects

Security Smart Services (securitysmartservices.site) — flagship project, in production, 2025. Network security audit platform that inventories devices, detects exposed ports/services, and alerts on changes or threats; cloud + local-agent architecture where scanning runs locally and only outbound WSS connections leave the network (a deliberate privacy/security decision), plus an AI assistant that interprets scan results. Backend server (Node.js/Express) deployed and administered on a Fly.io VPS, with a Supabase-managed PostgreSQL database server. Stack: React 18, TypeScript, Supabase, Node.js/Express, Groq AI (Llama 3.3 70B), Clerk, Fly.io, nmap.

Nutriflow (nutriflow-sigma.vercel.app) — in production, 2025. Nutrition management app for body recomposition (gain/lose/maintain weight, build muscle) with meal logging, daily macro tracking against goals, meal plans, and fasting control, running on zero-cost infrastructure. Stack: Next.js, Supabase, Groq AI, TypeScript, Tailwind.

Active Calendar (activecalendar.site) — in production, 2026. Academic management tool that ingests the Blackboard (Anthology) calendar and displays the week's tasks with pending/done status; exports PDF/TXT/PNG reports and a Telegram bot with schedulable weekly reports plus email delivery. Backend deployed as a Cloudflare Worker (serverless edge server) with a Supabase database server. Stack: Cloudflare Workers, Supabase, Telegram Bot API, TypeScript.

Productivity OS (productivity-os-beryl.vercel.app) — in development, 2026. Productivity dashboard with customizable widgets (clock, weather, traffic, unread emails, bookmarks, crypto, currencies, sports scores, AI assistant), cloud-synced via Google account and designed for multi-monitor setups. Stack: React, Google OAuth, Spotify API, Groq AI.

Personal Portfolio (osnarci.online) — personal website built in vanilla HTML, CSS, JavaScript.

TIC Tours (university programming platform, co-developed); Python unit-conversion tool with external API integration; single-cycle vs. pipelined processor performance simulator.
